SUPPLEMENTAL AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This supplements the amendment filed by certificate of mailing on March 3, 2000.

RECEIVED
MAR 27 2000
TC 3600 MAIL ROOM

Please further revise the claims, and add claim 32, as follows:

1. (Twice Amended) An intravenous infusion equipment hanger assembly comprising:

at least one mounting member that includes a flat mounting portion for attachment to a partition that defines housing space for a patient and has a generally vertical planar surface,

means for attaching said flat mounting portion to such a partition with said flat mounting portion disposed in a generally vertical position parallel to and adjacent such vertical planar surface of such a partition when so attached,

a hanger which includes an elongate pole for supporting an intravenous infusion device, and

at least one offset support engaging and extending laterally from said pole and joined to and extending laterally from said mounting member and supporting said hanger generally parallel to said flat mounting portion with said pole in a generally vertical position generally parallel to said flat mounting portion and spaced laterally from said flat mounting portion and from the respective partition surface to accommodate convenient mounting, use and removal of intravenous infusion equipment on said pole by a caregiver person when said mounting member is so attached to such a partition by said means.
